

Star Conveyor is a Material handling system, designed for transportation on pallet or directly on the chain. Our most powerful system manages goods weights up to 200 kg per pallet.

MS7000

Ingeniously simple

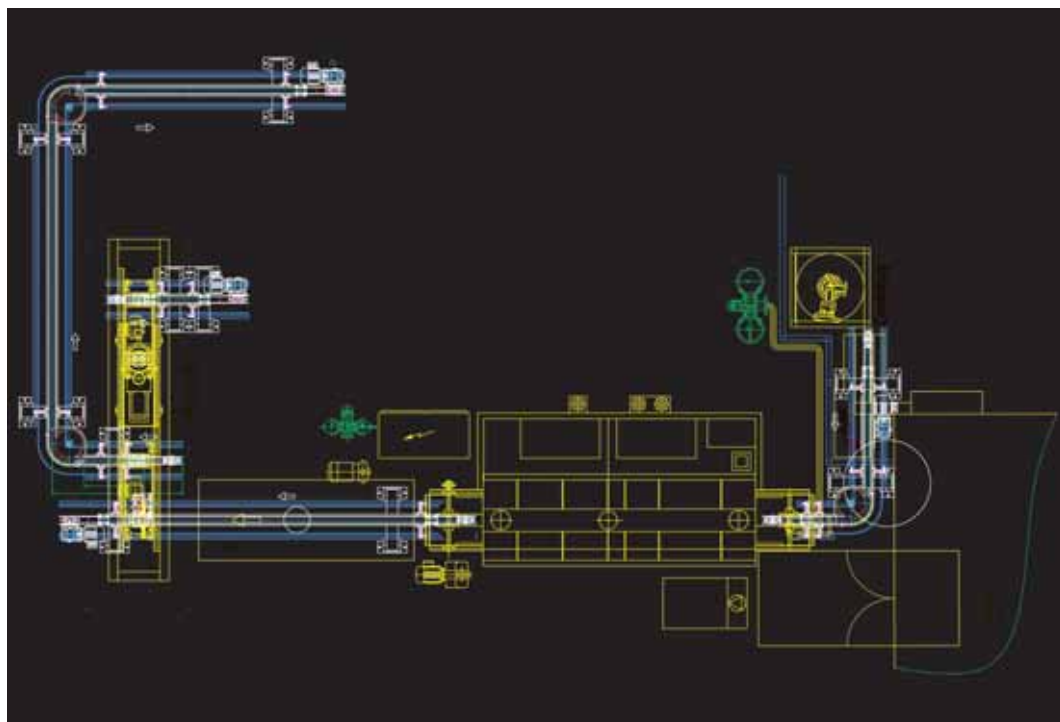

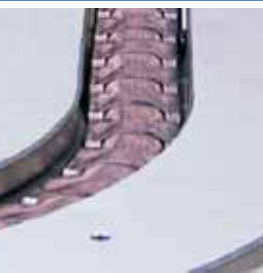

A new and compact system for detail transport directly on the chain, where a few components gives a unique combination of flexibility and economy. With its simple design the MS7000 system maintains all various demands of material flow.

MS7000

With the MS7000 systems unique design a wide range of chain types can be used, depending on product and environment. It gives you possibilities to a fast and simple rebuilding, particularly valuable in a production of short series. Stable design makes the MS7000 rigid and reliable.

MS7000

Basic Specifications
