

Star Conveyor is a Material handling system, designed for transportation on pallet or directly on the chain. Our most powerful system manages goods weights up to 200 kg per pallet.

## PS930

Ingeniously simple

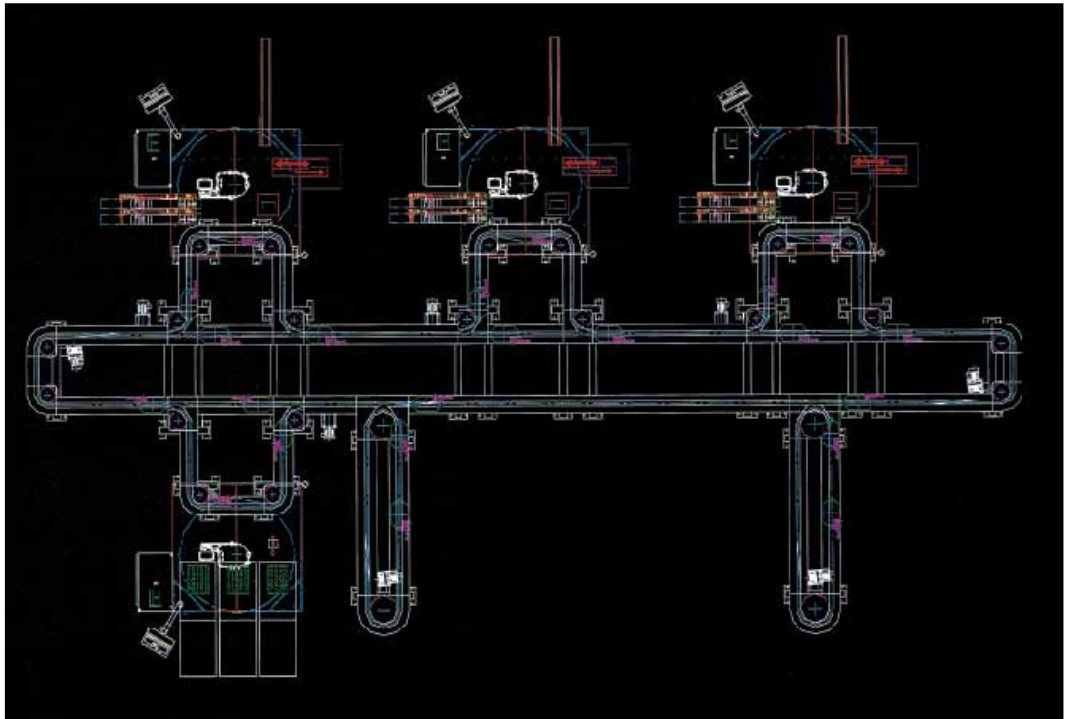

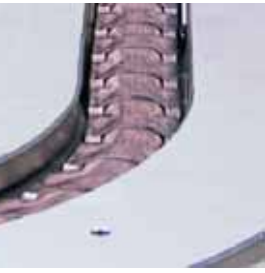

A system for interlinking and controlling flexible flows, the PS930 can be used in most branches and for most products – from simple machine stores to complete flow systems. With its modular construction, layout design is nearly free from restrictions.

## PS930

The pallet is a completely customer-adapted product. We design everything from basic solutions to the more advanced solutions that can easily transport up to eight objects on the same pallet. And even more if the customer wishes. Our expert designers have many years of experience and are accustomed making adaptations for various circumstances.

## PS930

### Basic Specifications

Conveyor type: Pallet system

Chain: Plastic chain

Object weight: 0-33 lbs. (0-15 kg)

### Special

- Pick and place
- Floating Pick-Up-Stations
- Pushers
- Codning
- Fixing stations with high precision
